RESIDENTIAL GAS-FIRED WATER HEATERS

ATMOSPHERIC VENT

FVIR Compliant

| 30 | 40 | 50 | 60 | U.S. GALLONS
FVIR TECHNOLOGY

All residential gas fired water heaters built with FVIR technology, meet the latest edition of the North American Standards ANSI Z21.10.1/CSA 4.1. They are specially designed to prevent the ignition of flammable vapours such as aerosol sprays, cleaning solvents, gasoline, paints, paint thinner, and thinner lacquer, outside of the water heater.

The Power Twist™ baffle increases the heat retention process better than a regular baffle. You get more hot water from the same gas consumption!
BENEFITS

1 - STAINLESS STEEL FLAME ARRESTOR
Superior no-rust design prevents flammable vapours from igniting outside of the sealed combustion chamber.

2 - RESETTABLE THERMAL CUT-OFF
Shuts down gas flow to the pilot and burner in the event that flammable vapours enter into the combustion chamber and ignite. Simple and easy to service, push the button to reset.

3 - SIGHT GLASS
Provides easy viewing into the combustion chamber to verify the operation of the pilot and burner.

4 - LOW NOₓ BURNER
Environmentally friendly. More efficient combustion resulting in a reduction of air pollution.

5 - PIEZO IGNITER
Makes lighting the pilot easy.

6 - LOW MAINTENANCE OPERATION
Air intakes and flame arrestor designed to minimize dirt and dust accumulation.

7 - DRAIN VALVE
Excellent quality, tamper resistant, one-piece brass drain valve is installed for easy drainage.

8 - INSULATION
A thick uniform blanket of eco-friendly insulation keeps the water hotter for longer periods, reduces standby losses and energy costs. Contains no HCFC’S (hydrochlorofluorocarbons), CFC’S (chlorofluorocarbons), nor VOC’s (volatile organic compounds).

9 - PATENTED POWER TWIST™ BAFFLE
Gives a higher efficiency than regular baffles (see figure on the previous page).

10 - FACTORY INSTALLED T&P RELIEF VALVE
Protects the tank from the damaging effects of excessive water temperature and pressure.

11 - FACTORY INSTALLED 3/4” NPT DI-ELECTRIC NIPPLES
Extend the life of the water heater by providing excellent corrosion protection.

12 - GLASS-LINED INNER TANK
A uniquely formulated blue cobalt glass enriched with zircon is fused to specially treated steel at 1,600°F (871°C) to provide the best coating available against corrosion for many years. The tank is certified at a test pressure of 300 PSI (2,068 kPa) and a working pressure of 150 PSI (1,034 kPa).

13 - HIGH-QUALITY MAGNESIUM ANODE
Provides excellent protection against the corrosive effects of water and extends tank life.

14 - AUTOMATIC TEMPERATURE CONTROL
Adjustable thermostat will provide years of reliable trouble-free service at the desired water temperature and an energy cut-off (E.C.O.) is provided for abnormal conditions.

15 - ROLL-AROUND BASE
Provides easy handling for installer without damaging the floor during installation.
Giant offers a SIX (6)* year limited warranty against inner tank leakage from the date of installation. SIX (6)* year limited warranty on component parts. For more specific warranty details including exceptions, consult the owner’s manual that comes with each water heater.

*When installed by a professional.

In accordance with our company policy of on-going product improvement, Giant Factories Inc. reserves the right to make changes without prior notice.
