Enhancing everyday living

BENEFITS

1 - DOUBLE GLASS-LINED INNER TANK

A double coating of a uniquely formulated blue cobalt glass enriched with zircon is fused to specially treated steel at 1,600°F (871°C) to provide the best coating available against corrosion for many years. The tank is certified at a test pressure of 300 PSI (2,068 kPa) and a working pressure of 150 PSI (1,034 kPa).

2 - MEDIUM DENSITY SCREW-IN TYPE ELECTRIC ELEMENTS

This model is equipped with medium density CSA approved screw-in type immersion elements made by Giant.

3 - INSULATION

A two (2) inch (5 cm) thick uniform blanket of **GREENFOAM** eco-friendly insulation keeps the water hotter for longer periods, reduces stand-by losses and energy costs. **GREENFOAM** contains no HCFC's (hydrochlorofluorocarbons), CFC's (chlorofluorocarbons) nor VOC's (volatile organic compounds).

4 - FACTORY INSTALLED 3/4" NPT DI-ELECTRIC NIPPLES

Extend the life of the water heater by providing excellent corrosion protection.

5 - FACTORY INSTALLED HEAT TRAPS

Helps reduce the migration of hot water, thus limiting heat loss escaping through inlet and outlet fittings.

6 - SUPPLIED INSTALLATION KIT

Temperature & pressure-relief valve and 90° elbow overflow tube are supplied with each Expert Plus 8 water heater. The temperature & pressure-relief valve protects the tank from the damaging effects of excessive temperature and pressure.

7 - HIGH QUALITY MAGNESIUM ANODE

Provides superior corrosion prevention and extended tank life.

8 - BRASS DRAIN VALVE

High-quality and tamper resistant one-piece brass drain valve is installed for easy drainage.

9 - AUTOMATIC TEMPERATURE CONTROL

Adjustable thermostats will provide years of reliable trouble-free service at the desired water temperature and a safety cut-off is provided for abnormal conditions.
